## How to Connect to PDS using Droid

- First is the network connection there are 2 methods:
  - 1. Wireless connection while at work (You don't need to use your VPN)
  - 2. Wireless (Home) or 3g \ 4g connect via by VPN
    - To setup a vpn scroll the top down

	1:43 Thursday 3	
	Trend Micro Mobile Security Device now protected	
-	Open Advanced Task Killer 1:16 Menu->Settings to disable this.	
•	Click on the gear (Settings)	
	Settings	
	WIRELESS & NETWORKS	
	Airplane mode OFF	
	Wi-Fi Col	
	Bluetooth OFF	
	Tethering & Mobile Hotspot	
	🛃 Data usage	
•	More	
•	Click on More	
	Wireless & networks	
	VPN	
	Mobile networks	
-	Media share settings	
-		

Click on VPN

Click on add VPN

Edit VPN profile			
North			
Туре			
РРТР			
Server address			
PPP encryption (MPPE)			
Cancel			

 Add in you needed information and click save (This information we may not have)

Click on it and connect

-

• Then you will be able to connect via by VPN to PDS using ConnectBot

- Second download ConnectBot from Google Play:
  - You can go to Google Play and search for ConnectBot
  - o <a href="https://play.google.com/store/apps/details?id=org.connectbot&hl=en">https://play.google.com/store/apps/details?id=org.connectbot&hl=en</a>
  - Using your QB Reader

• Once you have downloaded it go to you Apps directory and look for:

- o Click on ConnectBot
- Before entering in anything we need to go to the setting area to get there usually it is the button on the lower left hand side of the phone.

- Click on settings
- Scroll down and click on Emulation mode and change it to VT100
- Click the back button on the bottom of the phone usually looks like:

- Next it will try to connect and if it does it will ask you for the password.
- $\circ$   $\,$  On phones you can click the volume up and down button to magnify.
