PPTP VPN Setup. VPN is a tool that allows you to access remote networks. So you would be there virtually. By that you can access anything that's available when you are in the office. (Printers, Network shares, Programs, PDS, other PCs, servers, cameras, etc...). The only requirement is a dependable Internet connection. So technically you could access the office from home, Internet café, hotel, beach, airport like you would be there... If you have VPN setup on your PC. The number one step is to connect to the internet. If you can web browse than connect the VPN. If it connects you can use PDS and office programs. If you are in the office physically than skip the VPN connect step. You only need it outside of the office.

Step1 Right click on the network/wireless icon. Than select network and sharing center:

On Windows 10 or other modern Windows versions you can also try to type "virtual private" to the start or search bars:

Settings Results for "virtual private"	Search Settings	
Set up a virtual private network (VPN) connection	virtual private	× P
View network connections	Apps	0
	Settings	2
	Files	0

Step2 Click "Set up a new connection":

Step3:

۲	Set Up a Connection or Network	
Cł	noose a connection option	
	Connect to the Internet Set up a broadband or dial-up connection to the Internet. Set up a new network Set up a new router or access point.	
	Connect to a workplace Set up a dial-up or VPN connection to your workplace.	
	(Next Cancel

Step4:

Step5 Type the IP addess of your firewall (xxx.xxx.xxx example 92.584.34.222) For the Destination name field type Companyname_VPN:

Type the internet a	ddress to connect to	
Your network administra	itor can give you this address.	
Internet address:	XXX.XXX.XXX	
D <u>e</u> stination name:	PIA PPTP	
Use a <u>s</u> mart card		
2 <u>1112</u> 557 (5)	redentials	
Remember my c	reactions	

Step6: It will ask for Username/Password (please ask the network administrator for these details).

Connect to a Workpl	ace	
Type your user nar	ne and password	
User name:		
Password:		
	Show characters Remember this password	
Domain (optional):		
		Connect Cancel

Step7: To connect / Disconnect from the VPN use the network icon. This time Left click. You will see the list of the local wireless networks. On the list you will see a new item "Companyname_VPN" If you click it it will connect or disconnect. (Just like a wireless network. But forst make sure you are connected to a wireless or wired network, than hit the VPN as an addition):
